SUMMARY

First-Class Computing graduate with a strong foundation in data analytics, database management, and software testing. Proficient in executing SQL queries, processing large datasets, and building functional dashboards. Brings proven teamwork and high-pressure problem solving skills developed in fast-paced customer service environments. Seeking technical roles to deliver immediate business value.

EDUCATION

BSc. (Hons) Computing

Northumbria University

Newcastle Upon Tyne, UK | Sep 2025 – Jun 2026

- Grade: Graduated with **First-Class Honours (1st)**, achieving a final mark of 72.
- Core Modules: Big Data, Data Security and Governance, Computing Group Project, Computing Project Proposal and Practical, Contemporary Methods of Software Development.

Higher National Diploma in Computing

YOUTH International College

Yangon, Myanmar (Burma) | Nov 2022 – Jun 2025

- Grade: Achieved HND Distinction in all modules, broadly equivalent to a First-Class Honours (1st).
- Core Modules: Database Design & Development, Business Process Support, Machine Learning, Cloud Computing, Software Development Lifecycles, Internet of Things, Computing Research Project, Data Structures & Development.
- Awards: Won **First Prize** at the YIC IoT Project Contest 2025 with “**IoT-Based Livestock Management System**” project.

PROJECTS

UK Police Crime Big Data Analysis | Apache Spark, Microsoft Azure, Data Visualisation

[GitHub](#)

- Processed and analysed 65 million UK crime records using Apache Spark on Microsoft Azure, completing filtering and joins in minutes.
- Built a SARIMA time series forecast in Python and visualised it with Matplotlib on test burglary trends, showing a 50% fall from 2011 to 2021 and disproving the claim that burglary is rising.
- Joined crime data with ONS population data in Spark to rank firearms incidents per 100,00 people, presenting the results in a bar chart that placed Liverpool 4th rather than highest.
- Applied Spark MLlib correlation and regression to confirm a strong link between drug and firearms crime (Pearson 0.91), shown with a regression scatterplot.

World Life Expectancy Data Analytics | SQL, Data Cleaning, Data Normalisation

[GitHub](#)

- Analysed a global health and economic dataset (2,941 records, 193 countries, 2007 to 2022) using SQL to clean the data and answer key questions on life expectancy.
- Cleaned the raw data using the ROW_NUMBER window function to find and remove duplicate records, and Self-Join to fill missing values, including estimating gaps in life expectancy from the surrounding years.

- Wrote exploratory queries using JOINS, CTEs, CASE statements, and Aggregate functions to answer several analytical questions on life expectancy trends.
- Used the LAG window function to track year on year changes, spotting sudden drops such as 2020 fall that lined up with COVID-19.
- Found that higher GDP links to longer life expectancy up to a point, after which healthcare and education matter more, and turned each result into a report insight.

EXPERIENCE

Crew Member, McDonald's - Blaydon, Gateshead

Nov 2025 - Sep 2026

- Served customers across drive thru, dine in and delivery simultaneously in a consistently high-volume environment.
- Collaborated with a team of 8 to 10 staff during peak hours, supporting multiple stations, and adapting quickly to change priorities with teamwork and communication.
- Trained new crew members on food preparation, safety rules, and customer service.

SKILLS

- **Programming & Databases:** Python (Pandas, NumPy, Matplotlib), SQL (MySQL, SQL Server, PostgreSQL)
- **Cloud & Platforms:** AWS, Microsoft Azure
- **Data Visualisation & BI:** Microsoft Power BI, Tableau, Looker Studio
- **Data Methodologies:** Data Modeling, Data Cleaning, Data Normalisation, Dashboard Creation, Report writing
- **Software:** GitHub, Excel, Google Sheets, Microsoft Office Suite (Teams, Outlook, Word, PowerPoint)
- **Languages:** Burmese (Native), English (Professional Working Proficiency)

CERTIFICATES

- Google Data Analytics Professional Certificate Coursera Google, Feb 2025
- Introduction to Big Data Certificate University of California San Diego, Apr 2024

EXTRACURRICULAR ACTIVITIES

Volunteering Myanmar Traditional Events Certificate

- Demonstrated **strong teamwork and collaboration** during event coordination.
- Gained experience in organizing cultural activities and supporting event operations.
- Improved **communication skills** through interaction and participants and organisers.
- Developed **time-management** and **problem-solving** skills in a fast-paced environment.
